

# Fort Lauderdale/Hollywood International Airport Fort Lauderdale, Florida

## FLL Runway Closure & Delay Information Effective: May 3, 2011 through July 7, 2011

### FLL RUNWAY 9L/27R CLOSURE SCHEDULE

- May 3, 2011**                      RWY 9L/27R closure
- Complete high speed taxiways
  - Expand runway entry pads
  - Installation of RWSL
  - ILS facility relocation and antenna changes

First 7 days                      Closed 24 hours – prep fuel lines for construction

Remaining 58 days              Closed 20 hours / open 4 hours for selected departures

**July 8 2011**                      Runway 9L/27R reopens

## 2011 – RWY 9L Construction

### WHAT SHOULD PILOTS EXPECT?

Air Carriers & Business Aircraft are adjusting schedules

GA pilots using FLL should:

- Expect delays equal to the delays being experienced by all aircraft
- Plan for airborne holding. Delays may be lengthy and vary during the day.
- Expect Traffic Management Initiatives as needed to manage reduced airport capacity including Holding, Ground Stops, and Ground Delay Programs.
- Be prepared to hold safely in the congested airspace surrounding FLL
- Remain outside Class C (FLL) and Class B (MIA) airspace
- Expect RWY9R/27L to be unavailable because it intersects with RWY 13/31
- Review taxi routes used during RWY 13/31 operations
- Review NOTAMs and airport construction information

To minimize delays, pilots are encouraged to:

- Adjust schedules to avoid high demand periods at FLL
- Consider alternative airports if possible (ex. FXE, HWO, OPF, PMP)
- Use Customs available at FXE & OPF from 0900-2100 EDT, 7 days a week
- Advise ATC when able to depart RWY 27L from TWY E (4,028')

Questions about ATC procedures may be directed Monday-Friday 0700-1530 EDT to:
